

PLATFORM LIFT  
FOR STRAIGHT  
STAIRCASES

# SUPRA LINEA

ACCESS

Our Inclined Platform Lift is manufactured to meet the needs of customers who demand the best comfort and quality. Advanced in design and ergonomics, the Supra Linea is manufactured using only quality components. The perfect solution to overcome architectural obstacles and make your building accessible to all.

All of the exposed surfaces on the Supra Linea are made of anodized aluminum to guarantee a rust-free product. With the inclusion of the IP45 package, the Supra Linea is also suitable for outdoor use.

Supra Linea is designed for use on a straight staircase with a constant gradient.

BB

My business now has a great solution for enabling wheelchair users to visit the outdoor terrace. Its modern design seamlessly matches the style of my restaurant."

When the platform lift arrives at either the top or bottom landing the leading access ramp opens automatically, allowing the user to get on or get off the platform with minimal effort. The access ramps are raised again before travel, giving a sense of security to the user.

1

## Ergonomically Designed

The Supra Linea has an advanced ergonomic design, which has been developed in consultation with renowned consumer associations. This has enabled us to develop one of the most comfortable and safest inclined platform lifts on the market. The easy-to-use joystick allows the lift to move up and down the stairs safely and with minimal effort from the user.

2

2

## Compact and Discreet

The Supra Linea features a slim profile that occupies minimal space on the staircase when folded to just 14.57 inches. Its compact design integrates seamlessly into any environment, allowing others to move freely. This discreet lift is perfect for homes, businesses, or public buildings, providing accessibility without compromising space. It remains unobtrusive while always ready to ensure effortless mobility.

3

## Safety

Our customers' safety is of paramount importance to us. The Supra Linea is certified to ASME A18.1 and ASME A17.5. It is fitted with anti-impact and anti-shearing safety devices, which bring the lift to an immediate stop if they encounter an obstruction on the staircase, as well as an overload device that signals if too much weight has been loaded onto the platform, preventing the lift from moving until the excess load has been removed.

1

3

1

**Automatic Safety Bars**

The Supra Linea has automatic safety bars that surround the user during travel. As the lift arrives at either the top or bottom landing, the leading safety bar is raised, allowing the user to get on or off the lift. This is lowered again before travel, giving a sense of security to the user.

2

**On-board Controls with Ergonomic Keys**

The onboard controls make it simple to operate the Supra Linea. The ergonomic keys are shaped so that they can be operated with minimal effort while their design remains aesthetically pleasing.

3

**Anti-Impact / Anti-Shearing**

The lift is designed so that it comes to an automatic stop if the platform detects an obstruction on the staircase. It has anti-impact / anti-shearing devices on the sides of the machine body and the underside of the platform.

4

**Anti-Slip Safety Floor Covering**

The Supra Linea is designed to be hardwearing and durable. Fitted with an anti-slip safety floor covering to prevent slipping and to reduce any cosmetic damage from frequent use.

When the lift is not in use, it can be conveniently folded away, taking only 14.57 inches of space, offering the ideal solution for any additional staircase users.

08 **OPTIONS**  
TAILORED TO  
YOUR NEEDS

When you choose the Supra Linea, you ensure the best solution for your accessibility requirements.

## Accessibility

With fully automatic folding platforms, a choice of platform sizes and intermediate stops, the Supra Linea is suitable for installation into almost every type of building. Available with an optional auxiliary power system that allows the lift to function in case of power outages for added peace of mind.

### Folding Seat

The folding seat is a standard for commercial applications; it allows non-wheelchair users to sit on the platform during travel. It is also available as an option for residential applications.

### 90° Access Ramp

The access ramp is a standard feature on both platform sizes, it facilitates getting on/off the platform when there is reduced space at the bottom landing.

## Control Station

### Radio Remote Control

The remote can be held by the user during travel or can be kept in possession of a designated operator and used as an attendant control.

### Call Stations with Buttons

The call stations are placed at each end of the staircase. They are normally fitted to the wall but when there is no wall nearby a call bracket can be supplied.

## Outdoor

With a standard protection rating of IP45, the Supra Linea is suitable for outdoor use.

10

### Rust-free

The Supra Linea has an extended use of anodized aluminum to provide you with a durable product which can withstand rust, ideal for any outdoor installations.

### Outdoor Cover

When not in use the Supra Linea can be supplied with a fitted showerproof protective covering.

BB

The grounds are one of the reasons I bought this house. Now I can experience the entire garden without access limitations."
